

## **Orbit Financial Technology and Investment Solutions Consultants announce a strategic partnership to provide Regulatory Horizon Scanning Services powered by Orbit AI to Investment Managers**

**January 2024:** Investment Solutions Consultants (ISC) and Orbit Financial Technology are pleased to announce that they have entered into a strategic partnership, combining ISC's extensive Regulatory change expertise with Orbit's industry leading AI platform. The partnership aligns Orbit's skills in working with unstructured data with ISC's knowledge of regulatory change to create an innovative approach to Regulatory Horizon Scanning tailored to the individual investment manager.

**Da Wei at Orbit,** commented:

"The pace of regulatory change, across global markets, is an on-going challenge for Asset Managers. With ISC's regulatory expertise, combined with the Orbit GenAI and data gathering capability, we are delivering a unique proposition to deliver clarity and transparency across the global regulatory landscape – we look forward to working with ISC in this exciting partnership."

**Warren Goillau at ISC,** added:

"We are very excited to work in partnership with Orbit, their cutting-edge AI skills complement our deep experience in Regulatory Change and consultancy, together providing the perfect solutions for our Investment Management clients' Regulatory Horizon Scanning."

### **About Orbit**

Orbit Financial Technology utilises a comprehensive set of AI models to streamline unstructured data sourcing, cleansing and tagging at scale - empowering a multitude of Financial Services Use Cases.

Recognising the untapped potential of unstructured data across financial Services, Orbit has been focused on harnessing this power since 2015. We were aware of the complexity, significant manual effort, and costs associated with this task, so we set out with a straightforward aim - to help organisation's master unstructured data by harnessing AI and providing instant access to a depth of unique and reliable alternative data sets.

Our platform is designed to meet a wide range of use cases, out-the-box', from GenAI powered investment research, quant-based data generation to ESG due diligence with full transparency to underlying sources.
